

WE ARE LOOKING FOR

Data Scientist Senior

Required:

- background in maths, preferably in probability theory and statistics or machine learning
- proficiency in mathematical modeling
- creativity in designing models
- working knowledge of Python
- modeling with SciPy, Statsmodels
- machine learning with Keras, TensorFlow

Plus for experience with:

- familiarity with AWS cloud computing

You'll be:

- designing predictive models for real-time sports results predictions
- back-testing and optimizing the models
- cooperating with our trading department
- having fun in a fast-moving company

Are you the smartest person in the room in your current job and your ideas are not being implemented? Do you want to participate on a challenging project combining data analysis, predictive modeling, cloud computing and low latency stream processing?

Show us you are the right person for our team and join us in modern offices in the Prague center.

Send your CV to jobs@ematiq.com
